## Flexible to the Core

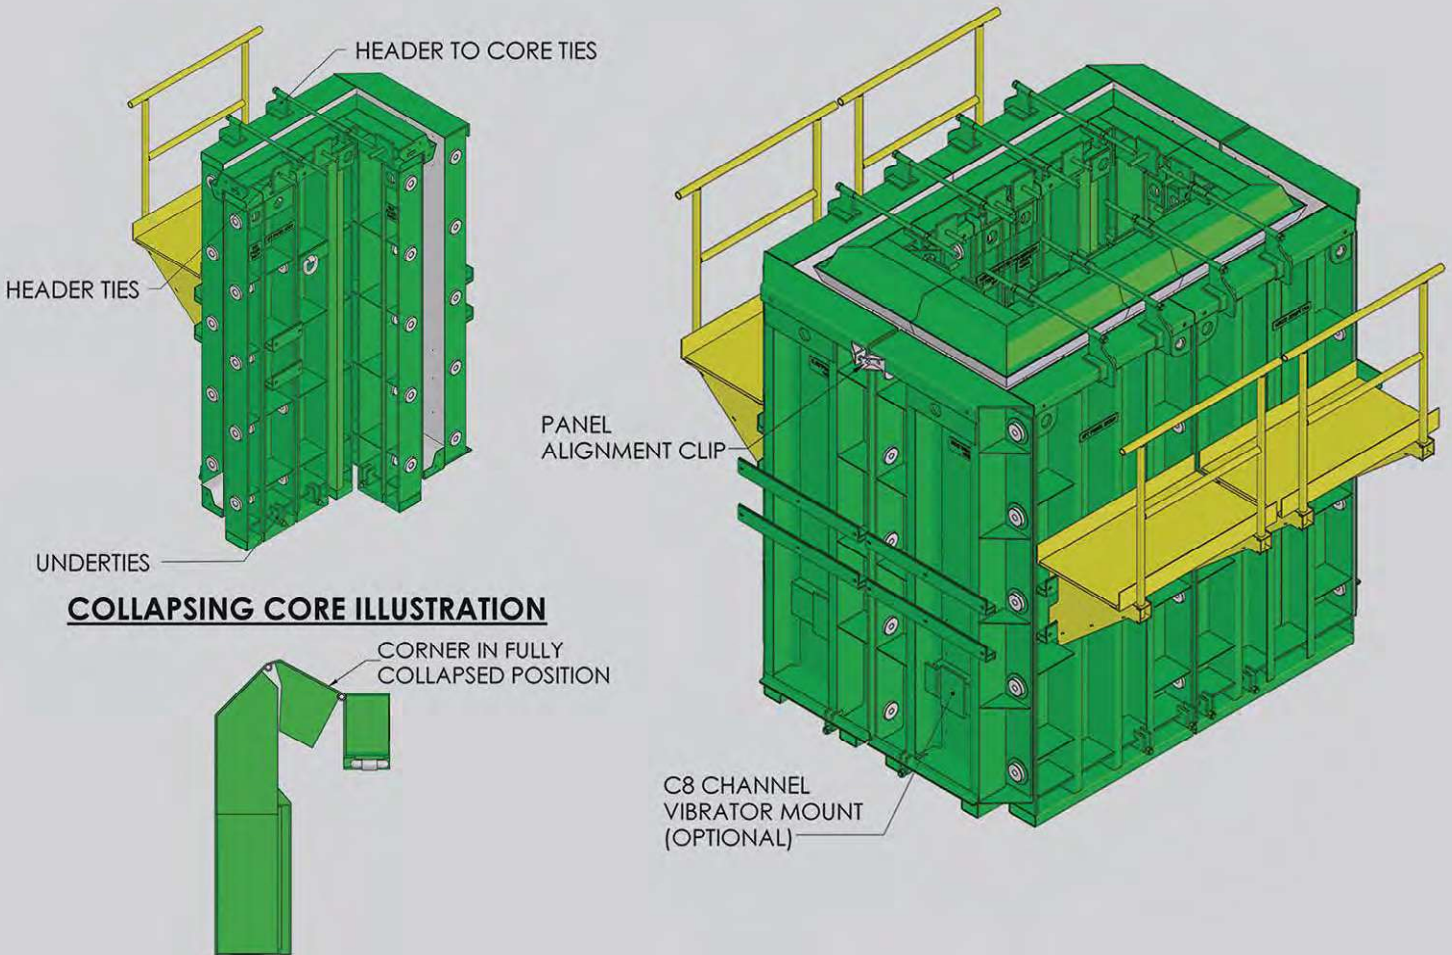

### Precision-Engineered Box Culvert Forms

For small bridge, water conveyance and retention applications, we have it all from individual forms to fully adjustable systems. Name the configuration, size, span and rise combination you need, and we'll engineer to your custom specifications. And even better - we work with other manufacturer's form work, saving you time and money.

# Box Culvert Forming Systems

## ADJUSTABLE BOX CULVERT SET UP

### Features of our System:

- Core filler panels and jacket filler panels are interchangeable.
- Spillman boss system is compatible with many other major systems.
- OSHA-conforming catwalk recommended for all forms 6 ft. deep or more.
- Minimum box culvert size: 3' x 5' inside dimension, filler panels to expand to a max. of 20' x 10'.
- Jacket, corners and filler panels are fabricated from 1/4" HR steel skins, 8" x 3" x 1/4" tube screed rails, C8 x 11.5 channel skin stiffeners on 12" centers.
- Header fabrication will be from 1/4" HR steel skin, 1/2" HR top plate and reinforced with 1/4" HR steel gussets.
- Pallet fabrication will be from 1/4" HR steel skin reinforced with 3/8" HR steel gussets.

### The Strength of the AFINITAS Family

Afinitas is a global, comprehensive and customer-oriented infrastructure equipment and services platform that brings together the expertise of HawkeyePedershaab, BFS, New Hampton Metal Fab, CAM Products and Spillman. Our combined strengths mean even more engineering expertise and selection are available for your next box culvert project. Learn more at [www.afinitas.com](http://www.afinitas.com).
