ePak Spare Parts Plans

In the fast-paced precast concrete production environment, unexpected equipment failures can bring operations to a grinding halt — causing costly downtime, missed deliveries and unnecessary stress. With Afinitas Spare Parts Plans, you can take control of your operation’s reliability by ensuring you have the right parts when you need them most.

ePak Spare Parts Plans Choose the plan that works best for your operation:	Essential Pack 	Advantage Pack 	Premium Pack 
Top Table Components	▲	▲	▲
Bell Packer Components	▲	▲	▲
Crosshead Components		▲	▲
Turntable Components		▲	▲
Feeder Components	▲	▲	▲
e-chain® Components			▲
Lubrication Components	▲	▲	▲
Filters Components	▲	▲	▲
Electrical Components		▲	▲
Hydraulic Components		▲	▲

A Note on Returns: All parts included in our plans are the property of the customer upon purchase. Due to the nature of spare parts stocking, we cannot guarantee returns.

Why Choose an Afinitas Parts Plan?

- **Minimize Downtime and Disruptions** – Our spare parts packages include critical wear and replacement components that help prevent unexpected breakdowns, safety risks, and costly work stoppages.
- **Proactive vs. Reactive Maintenance** – While Afinitas stocks tens of thousands of parts, we can't guarantee every part will always be available for immediate shipment. A customized stocking plan reduces the risk of delays, allowing you to stay ahead of failures rather than scrambling for solutions under tight deadlines.
- **OEM Quality You Can Trust** – All parts are sourced directly from Afinitas and backed by our commitment to precision, durability, and performance. No guesswork—just the right part for the job.
- **Expert Support, When and Where You Need It** – Our highly trained technicians have extensive product knowledge, ensuring fast and accurate troubleshooting whether on-site or remotely. Plus, when needed parts are already on hand, problem-solving becomes faster and more efficient.
- **Peace of Mind and Hassle-Free Ordering** – Parts evolve, go obsolete, or require updates. Our team ensures you get the correct part—without wasting valuable time searching or risking compatibility issues.
- **Seamless Budgeting and Procurement** – Spare parts packages can be included as part of a larger CAPEX investment when purchasing new equipment, avoiding separate, time-consuming approval processes down the road.
- **A Smart, Low-Risk Investment** – Your equipment will inevitably require parts replacement. Planning ahead means no surprises and no last-minute rush orders.
