

Alliance Service Partnership Programs

Partnerships that Span Generations

Inefficient plants and unexpected equipment failures create unnecessary costs in precast operations. Our AFINITAS Partnership Programs boost plant efficiency and uptime through optimization, preventive maintenance, and operator and form training services.

	Maintenance & Basic Training	Plant Optimization Programs		
Alliance Service Programs Choose the plan that works best for your operation:	Essential Plan  Great option for standard plant evaluation, operator training, and plant maintenance services (typically, 2–3 days onsite).	Advantage Plan  Includes all essential features plus plant benchmarking and our popular expert-driven reporting, which lays out a more detailed analysis of plant efficiency and recommended improvements (typically, 4–5 days onsite).	Premium Plan  Includes all previously listed program features, plus an AFINITAS expert-driven “Deep Dive” into overall plant efficiency and advanced operator training (typically, 2–4 weeks onsite).

Why Choose an AFINITAS Alliance Service Program?

- Receive dedicated, individualized technician time spent on ensuring the reliability of your machinery and forms.
- Proactive planning of program scheduling through pre and post visit meetings to propose and update on project expectations, scope, and visit wrap-up.
- Valuable, expert-driven optimization programs designed to improve plant efficiency, leading to higher production rates.
- Provides elevated access to our skilled technician and field engineering teams who can support MRO needs and provide comprehensive OEM training for your teams.
- Multi-year agreements provide for sustained, year-over-year Service Partnerships that greatly build upon the familiarity and trust that you have already come to expect from AFINITAS.
